

Spring is around the corner and so are the bugs. Ver-tech Labs has a variety of debuggers that can be easily applied with a portable **Foam Maxx Foamer**.

Need a degreaser? **Ace 10 Plus** is just one of our versatile heavy duty degreaser for engines, vehicles, walls and floors.

**Tired of seeing thin solvents run off a vertical surface and down the drain? Do you want to remove tar and asphalt more easily and faster??? Try Move Your Asphalt and Clean Safe – stop wasting time and chemical...and get a better clean!**

**Move Your Asphalt** gel tar and asphalt remover, removed 4 months old asphalt in 15 minutes

**Clean Safe** heavy duty truck cleaner and degreaser, orange solvent based cleaner to remove tar, asphalt, glues, gum and more

**Use Salt Shield® and stop road salt corrosion**

Salt Shield can be readily integrated into your routine maintenance procedures

In 2009, a city transit authority purchased new vehicles and the manufacturer would not honor the warranty unless the transit authority could document the use of a product to neutralize the corrosive effect of magnesium chloride in the local road salt. The city transit authority washes all 140 buses with Salt Shield daily.

In 2009, a large Midwest trucking company began to use Ver-tech Labs products including Salt Shield exclusively in their routine wash procedures. Trucks are washed each time they return to the property from a daily or weekly trip. In the first three years, no corrosion was detected on vehicles washed exclusively with Ver-tech Labs products.

Surface corrosion begins when road salts land on your truck. Salt Shield® loosens road salt's grip on your vehicle and ensures salts are rinsed off thoroughly. Salt Shield also provides temporary protection between washes.

# Clean Better

Solutions for the toughest cleaning problems the road throws at you. We manufacture the best detergents for touchless/friction automated vehicle washes, pressure gun washing and brushing applications. Clean faster and more easily with VTL products

**THUNDERBOLT**

Our best selling truckwash gets the dirty job done. Internationally, this detergent is known as the "magic truck wash soap." Concentrated high pH cleaner and degreaser featuring total road film removal technology. Thunderbolt is polished metal safe, reclaim compatible and environmentally green. Available for purchase online.

**TONKA HD**

Tonka HD is a versatile alkaline detergent for one step and two step cleaning applications. Fast acting on all types of soils, road film, soot and oils. Superior results even at higher dilution levels. Tonka HD rinses easily, reclaim compatible and biodegradable.

**SALT SHIELD®**

Originally formulated for bus fleet washing, Salt Shield ensures effective road salt removal in the wash and leaves a protective barrier to mitigate the effects of road salt corrosion. Salt Shield products are polished metal safe, reclaim compatible and environmentally green. Available for purchase online.

Do you want to improve the cleanliness of your vehicles? Do you want to clean quickly and easily? Do you want to protect your investment from the corrosive effect of road salts? Do you want to be more profitable because you are using the right amount of soap and using less time and labor to get a clean vehicle?

**Tonka HD** high pH detergent for touchless cleaning

Thunderbolt - the "magic" truck wash detergent

Large Vehicle & Equipment Cleaning

- ✓ Use the right chemicals for your wash conditions
- ✓ Use the right amount of chemical to clean, follow recommended dilutions and titrate regularly
- ✓ Use dispensing equipment for fast, efficient application
- ✓ Let the chemicals do the work

## THUNDERBOLT

*Thunderbolt is one of our most popular truck wash products. A concentrated metal safe alkaline cleaner and degreaser that makes vehicle and equipment cleaning easy. A multipurpose product, dilute for different types of applications. Thunderbolt removes diesel fuel, oils, grime and road film on all types of surfaces. Thunderbolt safely cleans metal surfaces, rinses easily and leaves a highly reflective surface. We washed the back doors of a trailer in less than five minutes resulting in doors that were "mirror" clean.*

*Thunderbolt is suitable for automated washes and hand washing. Thunderbolt application is efficient and easy using a Foam Maxx foamer. Our online store sells Foam Maxx foamers sized from 5 litres to 30 gallons. You can see videos of Thunderbolt at work on our Youtube channel and on our website.*

### Two Step Cleaning ... let the chemicals do the work.

Step 1: apply from bottom to top, a low pH detergent like **Stryker** on the surface of the trailer.

Step 2: apply a high pH detergent like **Tonka HD** directly on top of the Step 1 detergent. The ensuing chemical reaction will release road film, dirt, grime. Rinse the trailer thoroughly top to bottom.

Using a portable foamer like the **Foam Maxx** from Ver-tech Labs will allow a single operator to clean a 53 foot trailer by himself in about 30 minutes.

### New in 2016 — Foam Maxx Undercarriage Foamer

- Trucks drive over a low pressure foamer that won't damage sensitive components.
- Easy to install, permanent or portable installation.
- Anti-corrosion and bio-security applications
