**SECTION 4: FIRST-AID MEASURES****First Aid Measures**

- General Advice:** Immediate attention is required. Contains Strong Acid. Harmful or fatal if swallowed. Causes severe burns to eyes, skin, and respiratory tract. Wear protective clothing when handling this product. Keep out of reach of children. Use with care.
- Eye Contact:** Immediate medical attention is required. Immediately flush with cool running water for at least 30 minutes while holding eyelids apart. Do not rub affected area. Remove contact lenses if applicable. Take the victim to a doctor, preferably an eye specialist, as soon as possible. Ice water compresses may be applied to the eyes while transporting the victim to the doctor. Rubbing of the eyes is to be avoided.
- Skin Contact:** Immediate medical attention is required. Remove victim from the contaminated area and immediately wash the burned area with plenty of water. Remove all contaminated clothing while washing continuously. After thorough washing for at least 5 minutes, the burned area should be immersed in a solution of 0.13% iced aqueous Benzalkonium Chloride. Alternately, 2.5% calcium gluconate gel may be continuously massaged into the burn area. For burns not responsive to topical treatment, a physician may inject 2.5 - 5% aqueous calcium gluconate beneath, around, and in the burned area.
- Ingestion:** If swallowed, call immediately for emergency medical assistance. Ingestion of Hydrofluoric Acid is a life-threatening emergency. DO NOT induce vomiting. Have the victim drink several large glasses of water or milk to dilute the acid. If possible, give several ounces of milk of magnesia or any calcium containing antacid. Never give anything by mouth to an unconscious person.
- Inhalation:** Remove to fresh air. Call a physician or poison control center immediately. Calcium gluconate, 2.5% in normal saline may be given by nebulizer with oxygen. Victim should be examined by a physician and held under observation for at least 24 hours.

**Most Important Symptoms and Effects**

**Symptoms:** Severe burns to eyes, skin, and respiratory tract.

**Indication of any immediate medical attention and special treatment needed**

**Note to Physician:** Treat symptomatically as described above.
