

Q: Why do I need **SNAP SHIELD all surface protectant?**

A: Because the exterior of your vehicle is made up of more than than the painted surfaces that need protection.

- **SNAP SHIELD** works by chemically adhering to paint, glass, trim, plastics and more found on the vehicle exterior.
- **SNAP SHIELD** gives the vehicle some protection between washes against damaging UV rays, bird droppings, corrosive insect remains and acid rain.
- **SNAP SHIELD** adds “water repellency” which helps to bead and disperse water off of your vehicle surface.
- **SNAP SHIELD** will add some shine to your vehicle’s surface.
