SECTION 4: FIRST-AID MEASURES**First Aid Measures**

- General Advice:** Immediate attention is required. Contains Strong Acid. Harmful or fatal if swallowed. Causes severe burns to eyes, skin, and respiratory tract. Wear protective clothing when handling this product. Keep out of reach of children. Use with care.
- Eye Contact:** Immediate medical attention is required. Immediately flush with cool running water for at least 30 minutes while holding eyelids apart. Do not rub affected area. Remove contact lenses if applicable. Take the victim to a doctor, preferably an eye specialist, as soon as possible. Ice water compresses may be applied to the eyes while transporting the victim to the doctor. Rubbing of the eyes is to be avoided.
- Skin Contact:** Immediate medical attention is required. Remove victim from the contaminated area and immediately wash the burned area with plenty of water. Remove all contaminated clothing while washing continuously. After thorough washing for at least 5 minutes, the burned area should be immersed in a solution of 0.13% iced aqueous Benzalkonium Chloride. Alternately, 2.5% calcium gluconate gel may be continuously massaged into the burn area. For burns not responsive to topical treatment, a physician may inject 2.5 - 5% aqueous calcium gluconate beneath, around, and in the burned area.
- Ingestion:** If swallowed, call immediately for emergency medical assistance. Ingestion of Hydrofluoric Acid is a life-threatening emergency. DO NOT induce vomiting. Have the victim drink several large glasses of water or milk to dilute the acid. If possible, give several ounces of milk of magnesia or any calcium containing antacid. Never give anything by mouth to an unconscious person.
- Inhalation:** Remove to fresh air. Call a physician or poison control center immediately. Calcium gluconate, 2.5% in normal saline may be given by nebulizer with oxygen. Victim should be examined by a physician and held under observation for at least 24 hours.

Most Important Symptoms and Effects

Symptoms: Severe burns to eyes, skin, and respiratory tract.

Indication of any immediate medical attention and special treatment needed

Note to Physician: Treat symptomatically as described above.

SECTION 5: FIRE-FIGHTING MEASURES**Flammable Properties**

- Flammability:** Not considered to be a fire hazard.
- Explosive Prop:** Not considered to be an explosive hazard.

Extinguishing Media

- Suitable:** Use dry chemical, CO₂, water spray (fog) or foam.
- Unsuitable:** Contact with relatively small amounts of water creates violent reaction generating heat and spattering of hot acid. If use of water is necessary use copious amounts.

Specific Hazards Arising from Chemical

- Hazards:** The product causes burns of eyes, skin and mucous membranes. Thermal decomposition may lead to release of irritating and toxic vapors. In the event of fire and/or explosion do not breathe fumes.

Protective equipment and precautions for fire-fighters

Fire-Fight Method: In the event of a fire, fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Personal Precautions: Evacuate personnel to safe areas. Isolate hazard area and deny entry. Stay upwind of spill/leak. Use personal protective equipment. Avoid contact with skin, eyes or clothing.

Environ. Precautions: Prevent release to the environment if possible. Dike large spills to prevent material from entering streams or sewer systems.

Clean-Up Method: Soak-up with inert absorbent material and place into appropriate container for disposal. Clean contaminated area thoroughly with water. Prevent product from entering drains.

SECTION 7: HANDLING AND STORAGE

Handling: Wear personal protective equipment. Ensure all equipment is compatible with Hydrofluoric Acid. Avoid contact with skin, eyes, and clothing. Wash hands before eating, drinking, or smoking. Remove contaminated clothes and wash before reuse. Use in a ventilated area.

Storage: Store in closed containers in cool, dry, well-ventilated area. Avoid overheating or freezing. Keep in properly labeled containers and out of reach of children.

Incomp. Materials: Glass and silicate-containing materials. Alkalis. Carbonates. Sulfides. Metals. Oxidizing materials.
