VER-TECH DIFFERENCE

Ver-tech Labs is a family-owned and operated business based near Minneapolis, MN. We are proud to be the sole ISO 9001:2015 QMS Certified manufacturer of carwash chemicals in the United States. Our full product line includes high performance, quality chemicals for all types of washes.

Ver-tech is defined by a culture of excellence. Rigorous methodology in the laboratory, stringent quality control measures, speedy order processing, and experienced field support are key reasons Ver-tech Labs is a trusted chemical partner. We believe customers should expect more out of their chemical provider and continue to work hard to exceed our customer expectations.

YOU SHOULD EXPECT MORE OUT OF YOUR CHEMICAL PROVIDER.

Partnering with Ver-tech Labs offers more than just chemistry for your wash. With Ver-tech you can expect:

- **Quality Manufacturing**—ISO 9001:2015 QMS Certified
- **Innovative Products**—industry leading reclaim compatible formulations
- **Personalized Support**—we provide customized training and resources to help your wash succeed
- **World-Class Expertise**—our exceptional team is comprised of highly experienced, dedicated professionals
- **Industry Partner**—collaborating with industry peers that foster growth and advancement in the carwash sector

SAVE WATER & MONEY WITH CLEAN CHEMISTRY

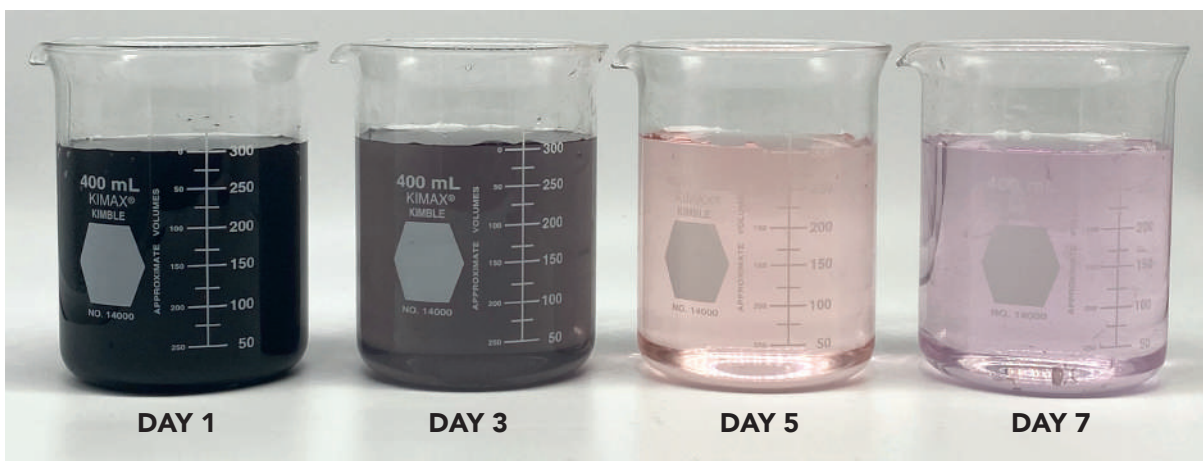

One of our customers described the switch to Ver-tech Labs chemicals:

“My cars are cleaner, the car wash walls and equipment are cleaner, and the place smells cleaner. It’s like clean chemistry.”

We like that description of Ver-tech’s reclaim compatible chemicals at work in the carwash - **Clean Chemistry**.

HOW IT WORKS

When carwash products are non-reclaim compatible, they contribute to the formation of masses within the reclaim system that collect contaminants and support bacteria growth. Translation: Your carwash smells bad and your reclaim water is dirty. In the photo below, samples of reclaim water were taken before and after our reclaim products were put online. As our reclaim chemistry goes to work, you will notice the significant change. Not only will your reclaim water look cleaner, but your wash results, your equipment and your facility will be cleaner.

FACT:

Our reclaim compatible formulas rinse & dry better.

FACT:

Reclaim compatible chemistry improves odors in the carwash.

FACT:

Using reclaim compatible chemistry allows you to reuse your reclaim water throughout the wash (rather than fresh water).

FACT:

Using reclaim compatible products reduces facility maintenance and repairs.

- Walls and equipment stay cleaner.
- Foamers and nozzles stay clean and clog free longer.

Laboratory testing show competitor products may be left on the vehicle surface even after rinsing.

BE THE BEST CARWASH WITH VAULT CONCENTRATES

VAULT HELPS YOU

- ✓ Handle chemicals more easily and safely.
- ✓ Save on shipping costs as more product can be shipped per pallet.
- ✓ Maximize limited storage space in the backroom.
- ✓ Maintain a cleaner, more organized backroom.

VAULT CONCENTRATES OFFER MORE THAN JUST GREAT PERFORMANCE

- Easy to use 1-gallon concentrates, color coded and paired with color matching reservoir tanks
- Enhanced employee safety with easy to handle containers and a no-touch chemical system
- Full line of reclaim compatible, water saving formulas
- Versatile system that is easy to install

VAULT Concentrates is the chemical choice for carwash operations today.
