

EXPERIENCE THE DIFFERENCE WITH
RECLAIM COMPATIBLE PRODUCTS

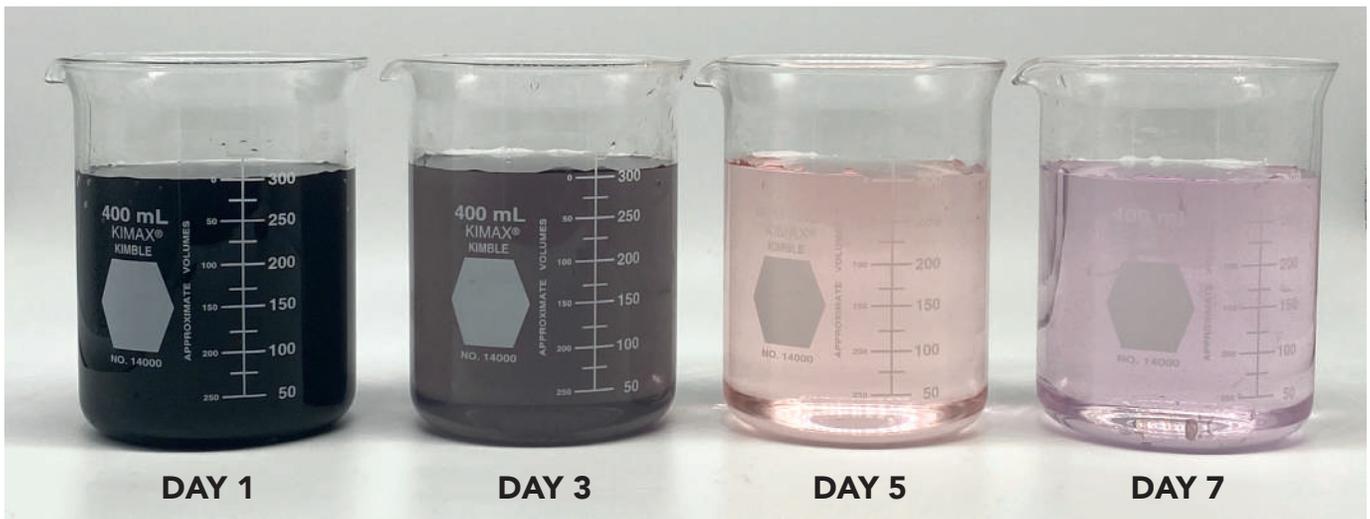

ISO 9001:2015 Certified QMS

BETTER RESULTS & A CLEAN FACILITY START WITH CLEAN CHEMISTRY

HOW IT WORKS?

When car wash products are non-reclaim compatible, they contribute to the formation of masses within the reclaim system that collect contaminants and support bacteria. Translation: Your car wash smells bad and your reclaim water is dirty. In the photo shown below samples of reclaim water were taken before and after our reclaim products were put online. As our reclaim compatible chemistry goes to work your employees and your car wash will notice the change. Not only will your reclaim water look cleaner but your wash results, your equipment and your facility will be cleaner.

FACT: Reclaim compatible chemistry improves odors in the car wash.

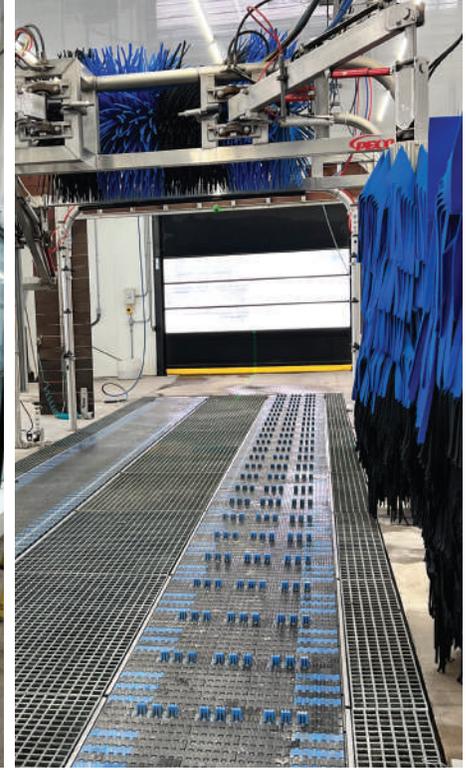

FACT: Our reclaim compatible formulas rinse and dry better. →

FACT: Using reclaim compatible chemistry allows you to reuse your reclaim water throughout the wash (rather than fresh water).

Laboratory testing completed against a competitor product (left) reveals better rinsing with Ver-tech Labs formulas (right.)

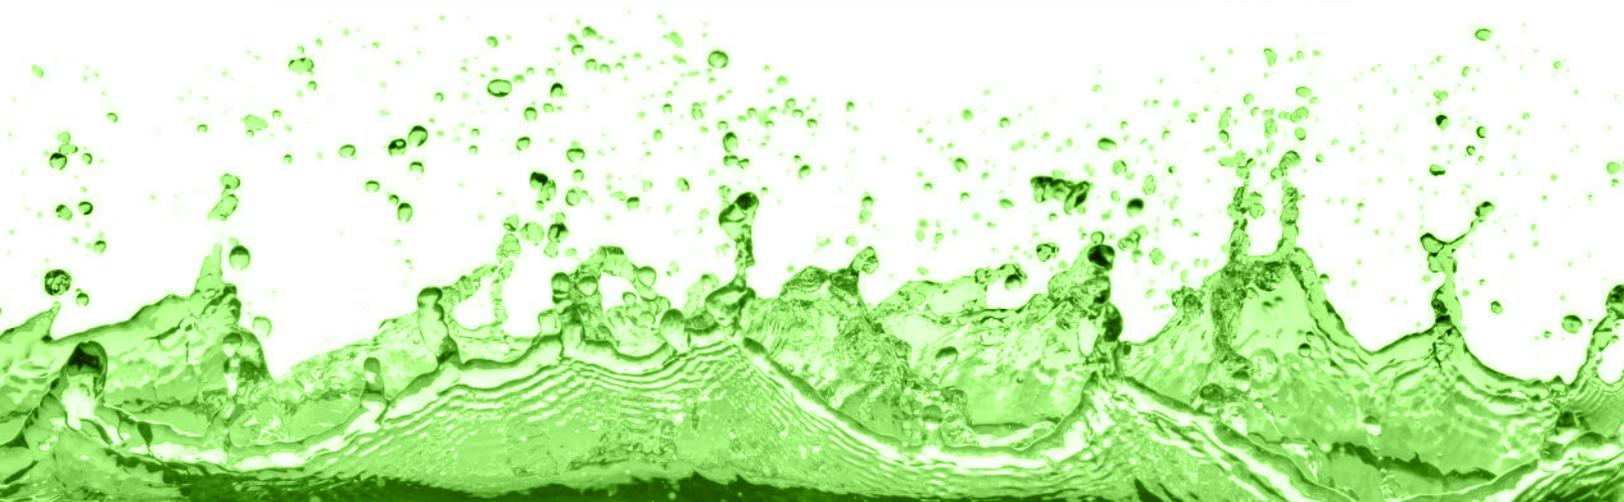

A RECLAIM SYSTEM USING **CLEAN CHEMISTRY SAVES YOU TIME, LABOR AND MONEY.**

- A higher percentage of reclaim water can be used *throughout* the wash.
- Walls and equipment stay cleaner, longer – reducing maintenance frequency and repairs.
- Foamers and nozzles stay cleaner – reducing clogs and maintenance.
- Reclaim pit maintenance time is significantly reduced.

Cleaner chemicals ensure your entire wash is operating more effectively. When you and your staff save time and labor on maintenance – you save money. The time saved allows your team to focus on training, developing other skills or additional items that can help you retain your employees longer.
