

VAULT SYSTEM • FINAL RINSE TECHNOLOGY

MAKE SPOTTING & HAZE **VANISH**

VAULT SYSTEM • RECLAIM COMPATIBLE®

Code • VT3800

Sizes • 4x1 Gal • 5 Gal

Reclaim water should work for your wash, not leave vehicles with spots, haze, or lingering residue. **VANISH** is a final-rinse technology designed for difficult water conditions, cutting through leftover soap film and lifting away hard-water minerals so vehicles finish cleaner, clearer, and ready to dry.

NO MORE SPOTTING

Hard-water spotting after the wash.

Spot-free finish with **VANISH**.

NO MORE HAZE

Reclaim-related haze and smearing after the wash.

Clear, haze-free finish with **VANISH**.

THE RESULTS

100% CLOSED-
LOOP
SYSTEM

One customer reported operating with 100% reclaim water while only using 1.5 gallons of fresh water per car after installing **VANISH**.

**OVER
20%** FRESH
WATER
SAVINGS
PER CAR

One customer had shut down their reclaim system because of haze and spotting, resulting in 35 gallons of fresh water per car. After **VANISH** went online, they turned reclaim back on and reduced fresh-water usage by more than 20% per wash.

*Customer-reported results. Actual results may vary based on water conditions, reclaim-system performance, wash configuration, chemical application, and other operating variables.

No reclaim system? **VANISH still delivers.** **VANISH** can improve final-rinse performance and help reduce the amount of wax and drying agent needed to achieve a clean, glossy finish.
